Elementary Storytelling illustrates how video and audio tools are used to tell a story - a digital story. Curriculum topics chosen by the teacher vary from class field trips to the reenactment of historical or current events.

Some digital stories include the entire class, while others use a smaller group of selected students. Video length is generally 2 to 10 minutes.

About Your Teacher

I am very excited to be your child's teacher this year. This is my 12th year at ABC Elementary, but have been teaching for 20 years. I was born and raised in El Paso, graduating from ABC University in 1900.

Classroom Expectations

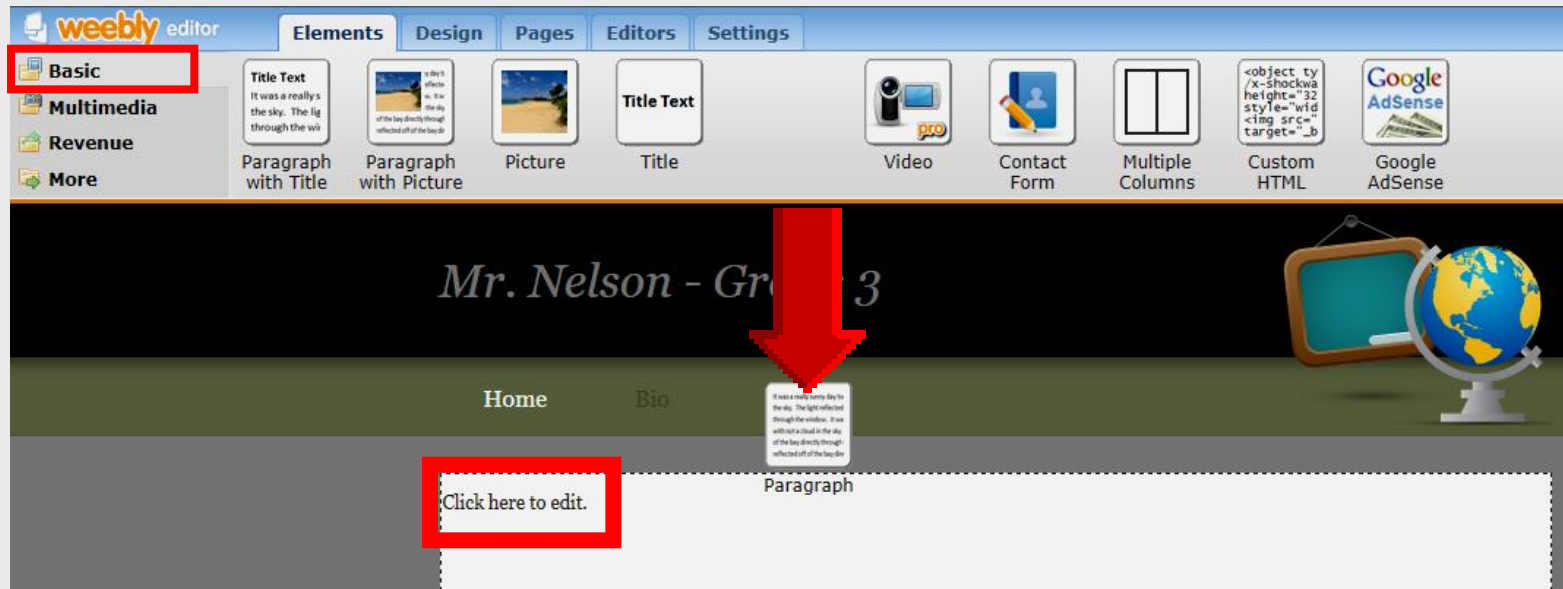

The children in my class should treat each other with respect. I use a token economy to reinforce this in my class children are given a token at the end of each day. The tokens are saved to "cash-in" for a prize on Friday. I read and sign the planner every day.
